Foreword

This publication is the fifth in a series which provides a comprehensive set of data on Australian fisheries production and trade. It provides production data for each major Commonwealth and state fishery for the period 1992-93 to 1994-95. Quantity and value information on foreign trade in Australian fisheries products is provided for the three year period ended 1994-95.

The publication of fishing industry production and value statistics is provided in response to requests from industry and fisheries managers for detailed fishery specific, and national, information. It is also provided to underpin Commonwealth, state and territory research funding arrangements.

Australian Fisheries Statistics can be used in conjunction with ABARE's major

compilation of statistics, *Australian Commodity Statistics*, which is also published annually and provides a historical series of production and trade statistics for fisheries commodities, and ABARE's *Australian Commodities*, in which forecasts for major fisheries commodities are updated throughout the year. Together these three publications give a comprehensive account of historical trends in, and the outlook for, Australian fisheries.

Brian S. Fisher
Executive Director

December 1995

Acknowledgments

This report was prepared by Rebecca Standen, David Campbell, Craig Pollard and Deborah Brown. The assistance of officers of state fisheries departments and the Australian Fisheries Management Authority, researchers and various industry representatives is gratefully acknowledged. Trade data were supplied by the Australian Bureau of Statistics.

Inquiries about state catch information should be directed to the coordinators of fisheries statistics in that state.

Definitions and explanations

Small discrepancies in totals are generally caused by the rounding of components.

A dash (-) is used to denote a nil or negligible amount.

Tuna

Tuna exports do not include tuna caught under joint venture or bilateral agreements, unless they are landed in Australia. Data are footnoted where appropriate.

Definitions

Production quantity is a measure of the quantity of fish product landed by fishery, usually on the basis of log book returns.

Production value is the assessed value at the point of landing for the quantity produced and excludes transport and marketing costs.

Aquaculture production is the quantity of product produced and marketed by aquaculturists.

Aquaculture value is the assessed value received by aquaculturists on the basis of an at 'farm gate' equivalent, for product marketed.

Export quantity data are supplied by the Australian Bureau of Statistics on the basis of the net product weight exported.

Export value data are supplied by the Australian Bureau of Statistics on the basis of free on board value.

Import quantity data are supplied by the Australian Bureau of Statistics on the basis of the net product weight imported.

Import value data are supplied by the Australian Bureau of Statistics on the basis of product cost plus insurance and freight.

Profile of Australian fisheries in 1995

Fishery	Area	Species	Main fishing method	Number of boats/units
Commonwealth				
Northern prawn	Gulf of Carpentaria, Cape York to Cape Londonderry	Banana, tiger, endeavour, king prawns	Otter trawling	124 boats
Torres Strait	Cape York Peninsula and south coast PNG	Mixed species – prawns, tropical rock lobster, Spanish mackerel, pearl shell, trochus and reef fish	Otter trawling, trolling and diving	451 boats
South east fishery	Commonwealth and state waters from Barrenjoey Point, NSW, around Tas. to Cape Willoughby in SA	Mixed fish species	Otter trawling Danish seine, demersal, anchored gillnet and demersal dropline/longline	122 trawl/ danish seine, boats and 500 gillnet/demersal line boats
Great Australian Bight	Commonwealth water between Cape Leeuwin, WA, and Kangaroo Island, SA	Deepwater flathead, orange roughy, Bight redfish	Demersal otter board, trawling and limited mid-water trawling	10 boats
Southern bluefin tuna	Commonwealth waters in areas to the south and south east of the AFZ	Southern bluefin tuna	Pole and line, purse seine, pelagic longline and trolling	104 domestic boats
East coast tuna	Commonwealth and NSW waters from Cape York to southernmost point of the AFZ	Yellowfin, bigeye tuna	Pelagic longline, handline, troll and rod and reel	174 pelagic longline boats and 187 minor line boats
East coast purse seine	Commonwealth and NSW waters from Cape York to southernmost point of the AFZ	Skipjack tuna	Purse seine and pole	19 boats
Southern shark	Commonwealth and state waters off SA, Vic. and Tas.	Gummy and school shark, other shark	Demersal gillnet and demersal hooks	125 gillnet boats and 31 hook boats
Bass Strait scallops	Commonwealth and state waters off Vic. and Tas.	Scallops	Dredging	155 boats
Jack mackerel	Commonwealth and state waters mainly south around the GAB, SA, Tas., Vic. and NSW	Jack mackerel	Purse seine, mid-water trawling	25 purse seine boats and 3 mid-water trawlers

PROFILE

Fishery	Species	Main fishing method	Number of boats/units
New South Wales			
Abalone	Blacklip abalone	Diving	40 fishers
Rock lobster	Eastern rock lobster	Pots	200 fishers
Prawn	Eastern king, school and royal red prawns	Trawling, hauling, seine, running net and pocket net	800 fishers
Crab	Mudcrab, blue swimming and spanner crabs	Crab pots, crab net	300 fishers
Other fish species	Mixed fish species	Seine, hauling	1300 fishers
Victoria			
Abalone	Greenlip, blacklip abalone	Diving	71 licence holders
Scallops	Scallops	Dredging	112 licence holders
Bay and Inlet	Mixed fish species	Various	204 licence endorsements
Rock lobster	Southern rock lobster	Pots	173 boats and 8101 pots
Inshore trawl	Mixed fish species	Trawling	61 licence holders
Queensland			
East coast trawl	Tiger, banana, red spot king, endeavour, eastern king, eastern school and greasy back prawns, scallops, slipper lobster and whiting	Trawling	891 boats
		Trawling	5 boats
East coast and Gulf of Carpentaria barramundi	Barramundi	Gillnet	383 licence endorsements
Beam trawl	Prawns	Trawling	223 licence endorsements
Net	Threadfin, mackerel, shark and mullet	Gillnet, seine	1102 licence endorsements
Reef	Mixed fish species	Handline, trolling	1800 licence endorsements
Crab	Mud, sand and spanner crabs	Pots, dillies	1061 licence endorsements
Western Australia			
West coast rock lobster	Western rock lobster	Pots	618 boats and 56 826 pots
Abalone	Greenlip, brownlip and Roe's abalone	Diving	26 licence holders

(Continued on next page)

Fishery	Species	Main fishing method	Number of boats/units
Western Australia (continued)			
Shark Bay prawn	King tiger and endeavour prawns, scallops	Trawling	27 boats
Exmouth prawn	King, tiger and endeavour prawns	Trawling	16 boats
Nickol Bay prawn	King, banana prawns	Trawling	14 boats
Shark Bay scallops	Scallops	Trawling	14 boats
South Australia			
Southern zone rock lobster	Southern rock lobster	Pots	188 licence holders
Northern zone rock lobster	Southern rock lobster	Pots	79 licence holders
Abalone	Greenlip, blacklip abalone	Diving	35 licence holders
West coast prawn	Western king prawn	Trawling	3 licence holders
Spencer Gulf prawn	Western king prawn	Trawling	39 licence holders
Gulf St Vincent prawn	Western king prawn	Trawling	10 licence holders
Marine scalefish	Mixed fish species	Hauling, handline, traps	526 licence holders
Pilchard	Pilchard	Purse seine	14 licence holders
Tasmania			
Abalone	Blacklip abalone	Diving	125 diving
Rock lobster	Southern rock lobster	Pots	338 licence holders and 10 531 pots
Aquaculture	Atlantic salmon, Pacific oysters	Cage culture farming	140 farms
Northern Territory			
Coastal	Finfish and bait	Line, net and trap	95 licence holders
Offshore	Mackeral, shark and reef	Trolling, hand and long line, net, trap and trawling	125 licence holders
Barramundi	Barramundi and threadfin	Gillnet	28 licence holders
Other	Molluscs, oyster, trepang, squid and aquarium	Hand harvest, jigging and a variety of other methods	29 licence holders

Trends in production and trade

Growth in GVP slows

The gross value of Australian fisheries production in 1994-95 is estimated to have risen by around 3.5 per cent to \$1.74 billion (table 1). This is a much lower rate of increase than the average annual rate of increase of 11.5 per cent from 1989-90 to 1993-94.

The main increase in gross value of production occurred in pearls in Western Australia (90 per cent), followed Australia-wide (tables 3 and 4) by tuna (7.1 per cent), prawns (4.2 per cent) and rock lobster (1.3 per cent). Aside from prawns, all of the apparent increases in production value were the result of higher prices. The increase in prawn value reflected a recovery in production from previously low levels, which more than offset lower prices. The value of production fell in some fisheries. For example, although landings of abalone rose, lower prices depressed the total value of production. Decreased landings also depressed the estimated value of scallop production.

Western Australia's contribution to Australian fisheries gross value of production increased from 31 per cent to 34 per cent in 1994-95 (tables 3 and 4). This relative increase in Western Australia's product value is attributable to both a fall in

the value of production in other states and an apparent 15 per cent increase in the value of Western Australian production. The increase in Western Australia's product value came mainly from a 90 per cent increase in the value of production of pearls and a 4 per cent increase in the value of rock lobster, Australia's highest valued fishery (table 8). A notable exception to the improvement in value for the Western Australian fisheries was a 41 per cent fall in the value of scallop production, due to an equivalent reduction in landings.

The value of fisheries production in Queensland is estimated to have fallen by around 6.7 per cent, largely a result of a fall in prawn prices (table 7). The total value of prawn production (including aquaculture) fell by an estimated 10 per cent. While Queensland scallop landings fell by 25 per cent, higher prices resulted in a 10 per cent increase in the value of scallop production. Fish production was little changed from the previous year, with lower prices leading to a 6.5 per cent fall in the value of production.

The total value of fisheries production in Victoria also fell sharply, by around 18 per cent, mainly because of the estimated 59 per cent fall in the value of scallop production (table 6). Despite a reported 6.7 per cent increase in total landings, total value of abalone production fell by 18 per cent. There was also a 16 per cent drop in fish landings which, combined with lower prices, resulted in an estimated 24 per cent fall in total value of fish production (excluding aquaculture).

The value of Commonwealth production increased by 7.5 per cent in 1994-95, mainly as a result of an increase in the gross value of production in the northern prawn and southern bluefin tuna fisheries (table 12). While prawn prices were down from last year, a 26 per cent increase in returns to the northern prawn fishery occurred as a result of a reported 39 per cent increase in landings from the low catches recorded in 1993-94. The 7.4 per cent increase in the value of

southern bluefin tuna production, however, was largely the result of higher prices. The major reductions in value came as a result of an apparent 14 per cent reduction in value for Australia's primary source of table fish, the south east fishery. This fall was caused primarily by the 32 per cent fall in the value of orange roughy landings. However, as most of the orange roughy catch is exported, this loss in production would have had only a minimal effect on Australian table fish supply, especially as landings of other species increased slightly over the period.

Despite a collapse in orange roughy landings in the Great Australian Bight fishery, the value of production was apparently little changed from last year, reflecting increased landings of other species, particularly of king flathead.

Trade growth continues

In 1994-95, the value of Australian exports increased by 10 per cent (table 16), while imports increased by 12 per cent (table 27). The net value of Australian trade in fisheries products in 1994-95 was worth \$701 million, or 51 per cent of export value.

Exports

The value of total fisheries exports increased in 1994-95 mainly as a result of increased returns from pearl, prawn, tuna and rock lobster exports. After rock lobster, prawns continue as Australia's second highest value fish export. The value of prawn exports increased by 17 per cent in

1994-95 as a result of a 24 per cent increase in volume. While the total value and volume of headless prawn exports remained much the same over the two years, the volume of whole prawn exports increased by 31 per cent. This led to an increase in the value of whole prawn exports of 23 per cent (table 18). In spite of the fall in orange roughy exports, the total value of fish exports increased by 7.0 per cent, because of the 15 per cent increase in product volume (table 17).

The value of rock lobster increased by 1.4 per cent to over \$474 million in 1994-95, despite an 8.1 per cent fall in the volume of exports. An important element in the maintenance of rock lobster export value has been a shift in product positioning in the export market to live, fresh or chilled product. There was a 13 per cent growth in the value of live, fresh or chilled product exports in 1994-95, following a 37 per cent growth in the previous year (table 18).

Aquacultural exports continued to increase in 1994-95, largely as a result of the reported 67 per cent increase in the value of pearl exports. As a result, the proportional value of pearl exports grew to 15 per cent of total exports in 1994-95 from 10 per cent in 1993-94 (table 16). In addition, part of the 53 per cent increase in the value of tuna exports (table 17) came from increased production of farmed tuna.

Falls in export values for 1994-95 occurred for abalone, scallops and other fish excluding tuna. Abalone exports fell by \$20 million or 11 per cent, despite a 14 per cent

Australian production and exports of seafood products, 1994-95

increase in volume (table 16). Scallop export fell by \$10 million, or 12 per cent, although volume decreased by nearly 40 per cent. Finfish export value, excluding tuna, fell by \$5 million or 4.5 per cent (table 17). The decrease in finfish exports stemmed primarily from a 30 per cent decrease in the value of fish fillets exports, due mainly to reduced orange roughy exports to the United States.

Japan remains the primary destination for Australian fish exports, accounting for about 40 per cent of the value of both edible and total exports (table 22). This is well above the next two most important export markets of Taiwan and Hong Kong, each of which took about 18 per cent of edible fish exports. Including non-edible exports, the value of exports to Hong Kong was 20 per cent of the total, while exports to Taiwan represented 15 per cent of the total value of exports.

Imports

The total value of Australian imports of fisheries products grew by 12 per cent to \$666 million, mainly as a result of a 21 per cent increase in the value of prawn imports (table 27). The other major import items were canned fish imports, which increased in value by 13 per cent, and scallops, which increased by 125 per cent, though from a relatively small base. Frozen fish fillets continue to be a major import item at nearly \$112 million, or 17 per cent of the value of Australian imports of fisheries products.

The main sources of Australia's imports were Thailand, which provided about 25 per cent of the value of total imports; New Zealand (18 per cent), and the United States (7.2 per cent). The largest increase in import value for any country was from Thailand where the value of total imports increased by 27 per cent as a result of a 46 per cent increase in imports of prawns (table 35).

Commodity Statistics 1995

Australian Commodity Statistics 1995 (formerly *Commodity Statistical Bulletin*)
is an invaluable reference for anyone associated with
Australia's fisheries, and agricultural and resource industries.

It is the only single publication of its type in Australia which provides a
comprehensive coverage of current and historical data on price, production and
export information covering more than 40 commodities, including:

- livestock
- grains and oilseeds
- horticulture
- fisheries products
- forest products
- petroleum
- coal
- natural gas
- iron ore and steel
- aluminium
- gold
- base and precious metals.

Also provided is comprehensive information on:

- farm sector output and employment
- balance of trade figures
- exchange rates
- interest rates
- foreign debt
- other macroeconomic indicators.

Up to 40 years of historical data are provided.

Published December 1995 (B5, 363 pp)
Price \$75 plus postage and handling (Australia A\$5, overseas A\$10)

To order, phone Janine Steele on (06) 272 2303.

Australian

FISHERIES

This annual statistical
bulletin provides
information on production
and trade for the Australian
fishing industry for the
three years ended 1994-95.

The report also includes a
profile of Commonwealth
and state fisheries in 1995.
